EXPERIENCE

Back Office Assistant - Universal Energy Solutions **1** *June 2025 – Present*

- Coordinated installation projects involving multiple stakeholders and contractors.
- Maintained project documentation, reports and material tracking records with high accuracy.
- Worked closely with teams to ensure timely project execution and issue resolution.
- Developed strong communication, coordination and problem-solving skills in a fast-paced environment.
- Maintaining site documentation: Requisition, Bill of Quantities (B.O.Q), Daily progress reports and material logs.

SELECTED PROJECTS

AI CHATBOT | *HTML, CSS, JavaScript, Node.js, Express, Gemini API* *(GITHUB)*

- Developed an AI-powered chatbot using Gemini API, Node.js and Express.js.
- Implemented real-time prompt handling with dynamic response generation.
- Reduced response latency through optimized API request handling.
- Utilized AI-assisted development tools ChatGPT Codex and Cursor for code generation, debugging, documentation, and rapid prototyping.

DATA VISUALIZATION DASHBOARD | *HTML, CSS, JavaScript, Chart.js,* *(GITHUB)*

- Developed analytics dashboard with bar, line and pie chart visualizations.
- Added CSV import and PNG/PDF export functionality for reporting and sharing.
- Built reusable chart modules to improve maintainability.

TASK MANAGEMENT APPLICATION (KANBAN STYLE) | *HTML, CSS, JavaScript, PHP, MySQL* *(GITHUB)*

- Implemented task creation, update, deletion and status tracking features.
- Designed drag-and-drop inspired workflow management interface for improved usability.
- Developed Kanban-style task management application with CRUD functionality.
- Integrated MySQL database for persistent task storage.

WEB DEVELOPMENT AGENCY | *WordPress, Elementor* *(LIVE DEMO)*

- Created custom landing pages to showcase web development services and portfolio showcase.
- Integrated contact forms and call-to-action sections to improve lead generation.
- Ensured cross-device compatibility and optimized site performance.
